Freelance Fullstack developer Upwork

11/2020 - Present

Remote

Achievements/Tasks

- EduTech project: MEAN stack (Alone).
- EduTech project landing page: Angular, TypeScript, and Bootstrap (with a team).
- Admin app: Angular, Bootstrap, and TypeScript (with a team).

Freelance Frontend Developer Viageur

10/2019 - 10/2020

Remote

Achievements/Tasks

- Contributed to the build of an application using Ionic, TypeScript, and Angular.
- Worked in an Agile-driven environment to maintain project timelines and effectively utilize resources.
- Updated layouts to enhance usability and performance.
- Reviewed code to validate structures, assess security, and ensure browser, device, and operating system compatibility.

EDUCATION

Linguistics

Ibn Tofail University

09/2016 - 06/2019

kenitra, Morocco

Software development MIAGE

10/2022 - Present

kenitra, Morocco

SKILLS

JavaScript

TypeScript

Angular

React

Ionic

Node

Express

REST API

Git

HTML

CSS

SCSS

Bootstrap

MongoDB

TailwindCSS

PERSONAL PROJECTS

DALL-E Clone

- Developed a website that generates images from textual descriptions, inspired by the DALL-E project from OpenAI. Used React, TailwindCSS, and Vite for the frontend, and for the backend I used Node, Express, MongoDB, Cloudinary, and OpenAI's API.

Goodreads Redesign

- Created a modern and visually appealing redesign of the Goodreads website using Angular, Bootstrap, Node, Express, and MongoDB.

ISS Location

- Built a real-time web application that displays the current location of the International Space Station using the ISS API, Leaflet.js, and OpenStreetMap. Implemented geolocation and reverse geocoding features to show the ISS's current location on a map with additional information.

CERTIFICATES

Responsive Web Design Certification (07/2018)

JavaScript Algorithms and Data Structures (09/2018)

Front-End Libraries (10/2018)

APIs and Microservices (11/2018)
